PROFESSIONAL SUMMARY

Aspiring Software Engineer with a solid background in coding and problem-solving, looking to contribute to impactful projects. Highly motivated to learn and collaborate in a fast-paced, innovative environment while gaining hands-on experience and advancing technical skills.

TECHNICAL SKILLS

- Languages : java, python
- web : Html, css
- Databases : sql
- Tools : Visual studio, Git
- Areas of Interest : Software Development, Machine Learning, Data Structures and Algorithms.

PROJECTS

Bvrith-chatbot

Designed and developed an AI-powered chatbot using VectorShift AI to assist students with academic queries. Integrated natural language processing (NLP) to provide accurate responses and improve engagement.

Real-time 3D Gesture and Traffic Sign Language Recognition

Developed a deep learning model using Multi-Layer Perceptron (MLP) and Mediapipe to recognize real-time traffic gestures and sign language. Implemented computer vision techniques to improve gesture detection and classification accuracy.

Traffic sign prediction: (Deep - learning project)

Developed a deep learning model using CNN and keras in python. Initially take the input images and find out the lines gradients, shapes and borders from the images. Then further layers helps in processing the output.

EDUCATION

- | | |
|---|-------------------------|
| • B.Tech Computer Science and Engineering
BVRIT HYDERABAD College of Engineering for Women | August 2025
CGPA:6.7 |
| • Intermediate(mpc) 2021
SR prime Junior College | Percentage: 77% |
| • 10th Grade (ssc) 2019
Geethanjali Digi School | Percentage: 97% |

ACHIEVEMENTS

- Bvrith chatbot accepted in ICDT 2025.
- 3D Gesture Recognition presented in ICMLAS in conference.

CERTIFICATIONS

- Java by udemy Academy
- sql by udemy Academy

EXTRACURRICULAR ACTIVITIES

- handball goalkeeper
- participated in Technical workshops
